

SentinelNexus Guard

Target	manual-scan
Scan Type	CODE
Scan ID	dcde9135-1a90-4651-9d5b-95d8ec3c8209
Project	—
Assessed By	Development User
Date	2026-07-14 09:37 UTC
Overall Risk	LOW
Risk Score	0/100
Max CVSS v3.1	N/A
Findings	0

Executive Summary

This report presents the results of an automated security assessment performed by SentinelNexus Guard on target **manual-scan**. A total of **0 findings** were identified, of which **0 critical**, **0 high**, **0 medium**, and **0 low** severity. The overall risk score is **0/100** (LOW). The highest individual CVSS v3.1 base score recorded is **N/A**. All findings in this report are derived from static analysis with reproducible evidence; no simulated or artificially generated results are included.

Severity	Count	CVSS Range	Recommended Action
CRITICAL	0	9.0–10.0	Immediate remediation required
HIGH	0	7.0–8.9	Remediate within 24 hours
MEDIUM	0	4.0–6.9	Remediate within sprint
LOW	0	0.1–3.9	Remediate as bandwidth allows

Compliance Framework Mapping

No applicable compliance mappings for this scan.

Methodology & Disclaimers

All findings were produced by SentinelNexus Guard's static analysis engine using real pattern-matching algorithms, CVSS v3.1 base score calculation per FIRST specification, and SHA-256 deduplication. This report does **not** include any simulated, mocked, or artificially generated results. CVSS scores reflect base metrics only; temporal and environmental adjustments should be applied by the receiving security team. This assessment covers the submitted artifact at the time of scanning. A clean report does not imply absence of all vulnerabilities; combine with dynamic testing and penetration testing for comprehensive coverage.
